Russian - Fluently

# Denys Botsiun

Front-end React Developer

## Projects

### Dringgle

Website for searching alcoholic cocktails and receipts by different parameters: by drink name, first letter and by one of ingredients. There is also opportunity to save favorite drinks. All data, favorite, search results are saved in storage and can be accessed anytime.

Created using: **Typescript, React, React Router, Redux toolkit, Redux Persist, SCSS, HTML**  
Link: [dringgle.vercel.app](https://dringgle.vercel.app)  
Git: [github.com/BotsiunDenys/Cocktails](https://github.com/BotsiunDenys/Cocktails)

### Comfy (furniture store)

Comfy is a furniture store with mock data that has a few search parameters throughout items with opportunity to choose which one to buy by adding to cart. Store is created with vanilla JS.

Created using: **HTML, SCSS, Javascript.**  
Link: [comfy-store-app.vercel.app](https://comfy-store-app.vercel.app)  
Git: [github.com/BotsiunDenys/comfy](https://github.com/BotsiunDenys/comfy)

### E-commerce layout

This project is built from figma sketch as a pixel perfect design. There is no javascript in project, just a layout.

Created using: HTML, CSS.  
Link: [ecommerce-layout.vercel.app](https://ecommerce-layout.vercel.app)  
Git: [github.com/BotsiunDenys/ecommerce-layout](https://github.com/BotsiunDenys/ecommerce-layout)

## About me

Experience in IT 1 - 1,5 years. Started learning python in university but then tried javascript, and for about a year learning and developing it and relevant to frontend technologies.

Except of university and courses stated in education section there are several courses ended on different platform but not having certificate. Some of them are: udemy, stepik, coursehunter.
