Projects

Portfolio website
Created using: *Typescript, React, React Router, React Toastify, Formik, Yup, SCSS, HTML*
Link: portfolio-botsiun-denys.vercel.app
Git: github.com/BotsiunDenys/portfolio

Dringgle

Website for searching an alcoholic cocktails and receipts by different parameters: by drink name, first letter and by one of ingredients. There is also opportunity to save favorite drinks. All data, favorite, search results are saved in storage and can be accessed anytime.

Created using: *Typescript, React, React Router, Redux toolkit, Redux Persist, SCSS, HTML*
Link: dringgle.vercel.app
Git: github.com/BotsiunDenys/Cocktails

Comfy (furniture store)
Comfy is a furniture store with mock data that has a few search parameters throughout items with opportunity to choose which one to buy by adding to cart. Store is created with vanilla JS.

Created using: *HTML, SCSS, Javascript*.
Link: comfy-store-app.vercel.app
Git: github.com/BotsiunDenys/comfy

E-commerse layout
This project is build from figma sketch as a pixel perfect design. There is no javascript in project, just a layout.

Created using: HTML, CSS.
Link: ecommerse-layout.vercel.app
Git: github.com/BotsiunDenys/ecommerse-layout

About me

I am passionate beginner frontend developer with about 1 year of experience. Highly interested in joining a team to create something new and useful. Despite the absence of commercial experience, but having in working with team (not in development) i am sure that my interesting and passion about programming will be helpful in solving further problems and job at all.
